Experience

- **Full-Stack Developer (Capstone Project)**
 - Led the development of a web-based information system.
 - Developed frontend and backend features using Laravel, Bootstrap, JavaScript, and MySQL.
 - Designed the database structure and implemented system functionality based on client requirements.
- **Freelance 3D Artist - Fiverr (2021 - Present)**
 - Created custom 3D models and renders based on client requirements.
 - Worked closely with clients to understand project needs and deliver high-quality results.
 - Produced assets for games, product visualization, and other digital content.

Projects

- **Tradihomes – Homeowners Association Information System**
 - Developed a full-stack web application for managing homeowners association records, announcements, and user accounts
- **MovieApp - 2026**
 - Personal project - not for commercial use, movie streaming web application using React and Next.js, integrated with a movie API to display trending films, details, and search functionality. **Link:** justinjavier-moviepage.vercel.app
- **Fingerprint Authentication System**
 - A project-based fingerprint authentication system that provides secure user login through enrollment and verification features.
 - ESP-32 firmware, a fingerprint sensor module, and a web interface
Repo: <https://github.com/Ta1ltail/fingerprint-auth-system>

Skills

- **Languages:** JavaScript, PHP, TypeScript, Java, Python
- **Framework:** Laravel, React, Next.js, Bootstrap
- **Technologies:** REST APIs, MySQL, Node.js , Figma, Microsoft Office

Education
